

Constructing Marxist Ethics

edited by Michael J. Thompson

Marx and subsequent Marxists have often been chided for paying insufficient attention to purely moral and ethical questions. *Constructing Marxist Ethics Critique, Normativity, Praxis* brings together leading Marxist thinkers from various fields to lay these charges to rest.

Does Marxism possess an ethical impulse? Is there a moral foundation that underpins the Marxist critique of capitalism and the vision for socialism? These essays, each from different vantage points, respond affirmatively to these questions and each examine what kind of values should be at the heart of the Marxian enterprise.
